

Professional lighting solutions for INDUSTRIAL facilities

CORA INDUSTRY LITE

Cora Industry LITE is the new standalone lighting control system, which is ideal for any industrial installation. With simple, quick, intuitive installation, Cora Industry Lite represents a turning point in development in the industry, providing renewal, control and full management of lighting in factories and warehouses.

It has a built-in light sensor, regulates the flux emitted by the luminaires to compensate for the contribution from natural light and achieves optimal energy use by continually monitoring the light level to adjust the luminaires to the levels set.

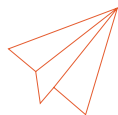

Functionalities

Efficient facility control

Simple, intuitive installation

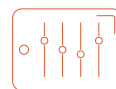

Standalone control system

Precise DALI Broadcast regulation of up to 64 drivers

Direct light level setting by push button

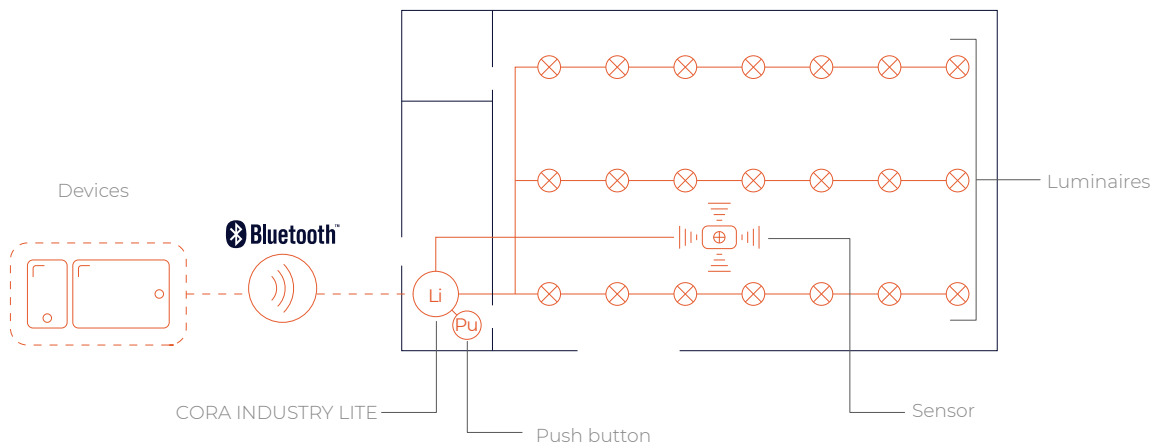

Advanced setting from the iOS Play LITE app

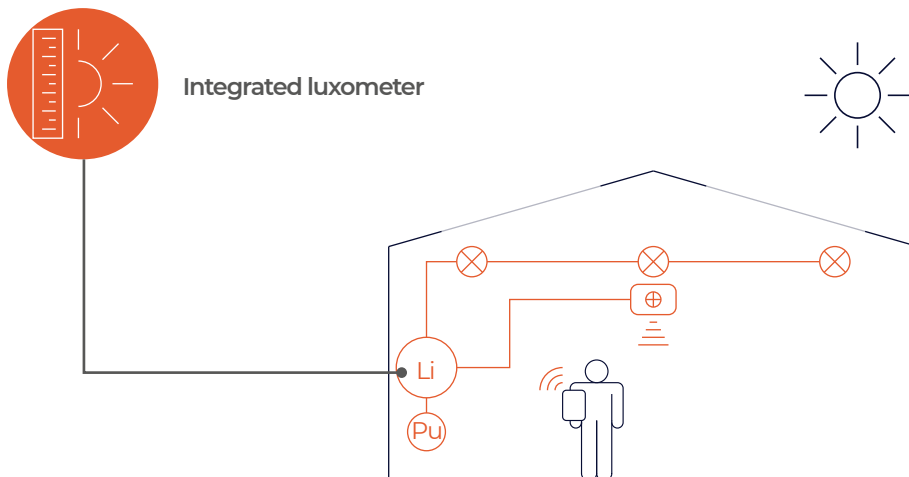

Cora Industry LITE /

Industrial building lighting

Outstanding among its main features of the automatic regulation of the luminosity level pushing button with no need to install any software, except for advanced settings through the IOS Play LITE app with the possibility of incorporating presence detection networks.
